

Resurrection

Believing you may have life.

Belief means it is worth the risk

Belief means there is no point at which it is all over

Belief means that I can attempt to put it into context

Belief means I am prepared to not understand

Belief means I need not be in control

Belief means that there is truth in beauty

Belief means that I am defined by love

Belief means that there is always something new

Belief means that the conclusion is nothing other than an illusion

Belief means that I can begin again

Belief means that I can allow you to be what you are

Belief means I can legitimately seek the beauty

Belief means that there is wonder in the very ordinary

Belief means that I am extraordinary

Belief means that those who have died have not abandoned me

Belief means that I can remain faithful to them

Belief means that this is today's tragedy

Belief means that even within the pain I am formed, and arise again

Belief means that I breathe the history

Belief that I can love you and them

Belief means a life I do not understand

Belief in that which is beyond me

And a part of me

and calling me

Have faith

move on
